ACTION	YES	NO	N/A	COMMENTS
Was the sod approved at its source before it was dug?				
Are the weather and soil conditions favorable for sodding? If there is a doubt, the Roadside Environmental Field Operations Engineer should be consulted.				
Consult the Contract and/or Roadside Environmental Field Operations Engineer to determine if soil samples are required prior to soil preparation.				
Prepare the soil; place limestone and fertilizer in accordance with the contract requirements.				
Ensure that the Contractor has adequate equipment to keep the sod watered.
